ABOUT US

Mr. Mustafa Ali Gülver, MAG Engineering General Manager, began his career as a graduate from the Istanbul Technical University, Faculty of Civil Engineering in 1981. Between the years 1981 -1984, he has completed masters degree study at Istanbul Technical University, and also worked as an assistant teacher in Engineering Mechanics Department. As a founding partner, under the name of Selcuk Engineering, he has begun to provide Design Service Engineering in 1986. Between the years of 1989 and 2003 he has produced many Engineering Projects in his company named CSM.

In 2003, under the leadership of Mustafa Ali Gülver, MAG Engineering Services was established and became operational. With Mr. Gülver's experience more than 30 years and a wide-dynamic staff, MAG Engineering Services has produced many Engineering Projects until present time which were applied successfully.

MAG Engineering services continue to produce with its wide –dynamic staff located İstanbul and Ankara offices with the pride of being the most productive company in our country in the fields of Marine, Shipyard and similar Engineering Structures.

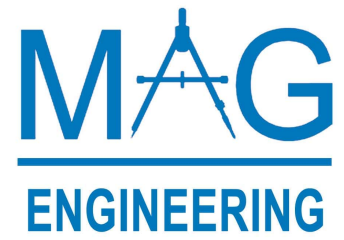

The Meeting Point of Knowledge, Experience and Economic Design...

Our company has always targeted providing quality engineering services by following the latest technology with its knowledge and experience on Marine Structures for more than 30 years. Regarding this target, our object is to please our clients by providing quality engineering service with the most economic solutions possible.

We will continue to be the right choice in the future as we have been in the past regarding the production of safe, functional and economic projects.
